Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/05/05 has been entered.

Response to Amendment

The drawing and specification objections have been withdrawn in view of the amendment filed 12/05/05.

The art rejections and double patenting rejections have been withdrawn in view of applicant's amendment and arguments filed 12/05/05.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14-15,17,20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Baran. (USPN 4,417,576).

Art Unit: 3763

Baran disclose a catheter comprising a balloon E having an outer surface, a reservoir/space disposed on the outer surface of the balloon wherein the reservoir is defined by a membrane having a plurality of pores (the sponge-like material between the 2 cuffs of Baran) is connected to a reservoir lumen S and a biostable sponge coating D disposed upon the membrane/sponge-like material which has a plurality of voids M. The material of the sponge coating is rubber. The balloon inflation lumen is T. Applicant has only functionally claimed the reservoir to be capable of containing a biologically active material. Claim 15 is considered to be product by process.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 16 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Baran (USPN 4,417,576).

Baran discloses the invention as substantially claimed. See above. The Examiner is considering Baran to have a void space, which is greater than about 60% of the volume of the sponge coating when in the expanded condition. If Applicant does not deem this feature to be anticipated as shown in Figure 3, then it would have been obvious to one of ordinary skill in the medical balloon art to

modify the void space to have a greater than about 60% volume of the sponge coating when in the expanded region in order to allow biological active material to be release to the tissue.

Response to Arguments

Applicant's arguments with respect to claims 14-17,20-22 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LoAn H. Thanh whose telephone number is (571) 272-4966. The examiner can normally be reached on Mon. - Fri. (First Friday off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nick Lucchesi can be reached on (571) 272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
